

**INVERTER WALL MOUNTED TYPE**

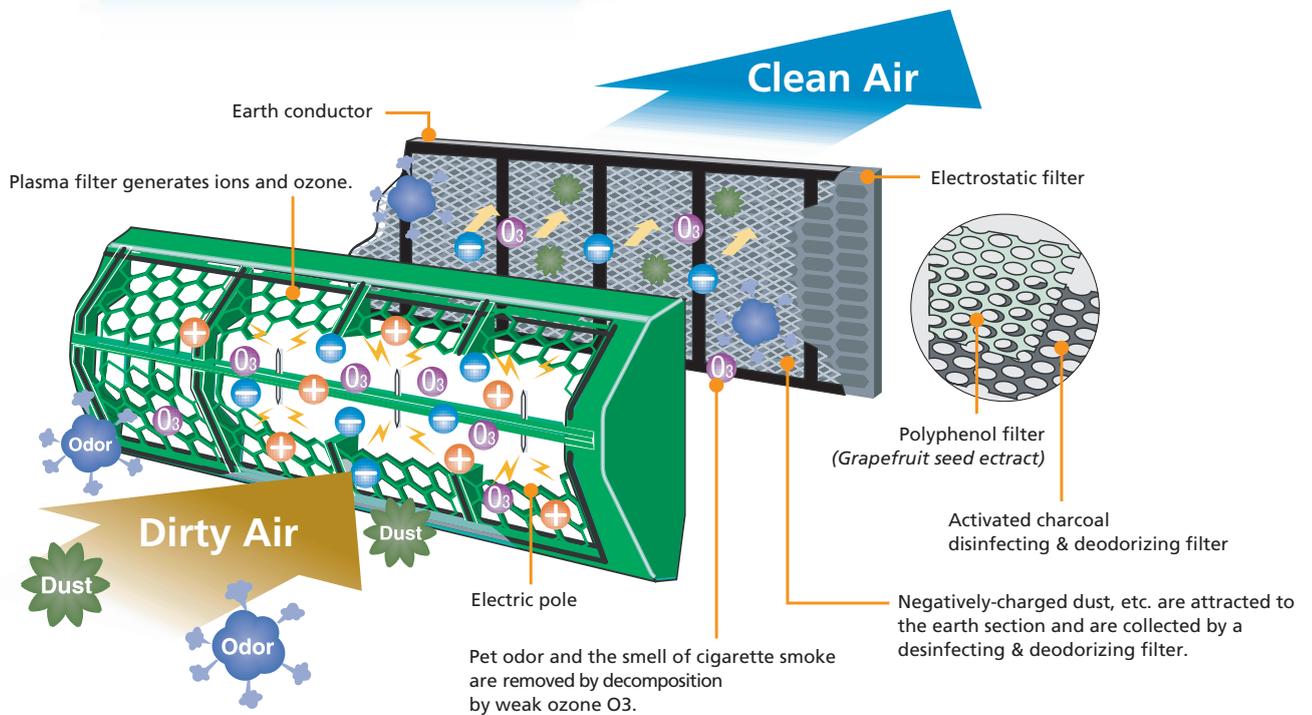

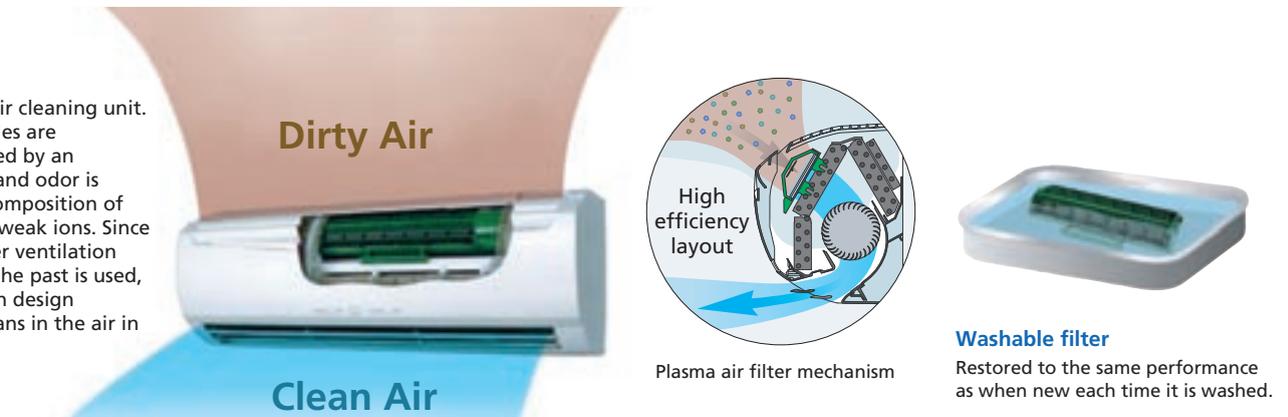

**PLASMA AIR CONDITIONER**

Original plasma air cleaning unit effectively cleans the air in the room.

**Plasma unit**

Mounts a plasma air cleaning unit. Minute dust particles are thoroughly collected by an electrostatic filter and odor is suppressed by decomposition of foul odors by very weak ions. Since a filter with a lower ventilation resistance than in the past is used, high dust collection design simultaneously cleans in the air in the room.

Plasma air cleaner quickly removes small dust particles and odors.

**Collects dirt such as...**

House dust / Pet fur and dander / Cigarette smoke / Mite carcass / Mold spore / Pollen

**Absorbs odors such as...**

Smell of cigarette smoke / Pet odor / Kitchen garbage smell / Perspiration and body odor

\*The following contents apply to ASYSB09/12/18LD models.

### Dust collection performance

Test method: JEM 1417 Test room: 30m<sup>3</sup>, sealed room  
Measurement conditions: Cigarette smoke (5 cigarettes burned simultaneously)

### Deodorizing performance

Test method: JEM1467 Test room : 1m<sup>3</sup>, acryl sealed box  
Measurement method: Cigarette smoke (5 cigarettes burned simultaneously)

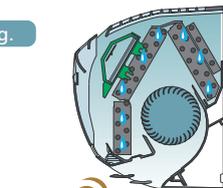

### Inner drying operation prevent growth of mold fungus and bad odor.

This model is equipped with an inner drying function. After the power is turned off, the dry operation starts inside the air conditioner.

Covered with beading.

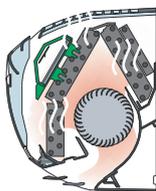

Bacteria grows in beading, and it causes bad odor.

After operation ends, start approximately 30 minutes speed cleaning operation by merely pressing the COIL DRY button.

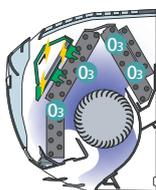

Removes moisture.

Drying operation for approx. fifteen minutes.

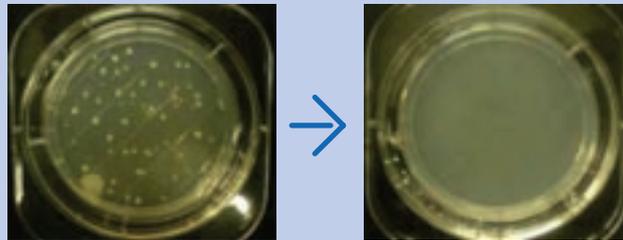

Sterilization.

Ozone sterilizing operation for approx. fifteen minutes.

"Inner drying operation" and "ozone sterilizing operation" keep the inside of the air conditioner clean at all times. That's why air from the air conditioner is always clean and high efficiency is realized.

### Sterilization effect by Polyphenol ceraglaze

The undiluted solution of the specimen was made the specimen fluid and suspensoid 0.1ml (approximately 107CFU/ml) of the test bacteria was inoculated.

Tested by KITAZATO environment science center Experiment bacteria: Staphylococcus Aureus/Escherichia coil Test NO. :15-0253 Test condition: at 20degrees C/24hour action

## Air conditioner filter features

**Apple-catechin filter** AF

Fine dust, invisible mold spores, and harmful microorganisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol ingredient extracted from apples.

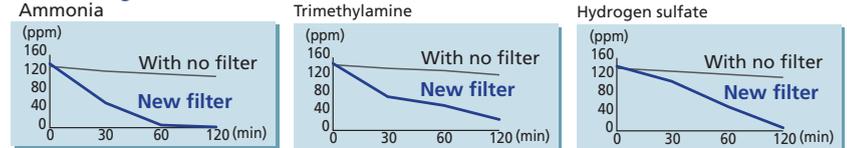

**Long-life\* Ion deodorization filter** Ion

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic. (\* The filter can be used for approximately 3 years if it is washed under water to restore its surface action when it is dirty.)

### Deodorizing effect (Odor reduction rate)

Testing organization : Environmental Sanitary Inspection Center Test method : Deodorization Test

## Easy maintenance

Easy maintenance and always clean.  
 Troublesome maintenance has been made easy.  
 Since the front panel is easy to remove, maintenance is also easy.

Open panel

ASYA07I09/12/14/18LC

ASYA24I30LC

## Inner drying operation

This model is equipped with an inner drying function. After the power is turned off, the dry operation starts inside the air conditioner. This prevents the growth of mold and bacterial inside the air conditioner.

During dewcondensation

Approx. 20 mins Drying
